

Wyoming Energy Brainstorming

Name: _____

Problem 1:

Wind turbines kill birds and bats.

Problem 2:

Wind Turbines turn a natural landscape into a man-made landscape.

Problem 3:

Wyoming can generate electricity for other places, but transmission lines don't reach all locations good for wind farms. People don't want to see lots of powerlines all over our state.

Problem 4:

Because the wind doesn't blow all the time, the wind turbines cannot always generate electricity for when people need it.

Solution 1:

Solution 2:

Wyoming Energy

Brainstorming

Revised Solution:

Wyoming Energy Questions

1. Is this solution going to solve the problem?

Yes or No. Why or why not?

2. Is this solution realistic?

Yes or No. Why or why not?

3. Does this solution cost a lot of money to make?

Yes or No. Why or why not?

4. Does this solution create bigger problems than the one you are trying to solve?

Yes or No. Why or why not?
